Education

B.Tech in Information Technology

KIET Group of Institutions

Expected Graduation: 2027

Arwachin International School

CBSE 10th – 93.8% (2021)

CBSE 12th – 89% (2023)

Certifications

- Google Cybersecurity Certificate
- CompTIA Security+
- Jr. Pentester – TryHackMe
- SOC 101 – TCM (Expected: Apr 2025)
- PSAA – TCM (Expected: May 2025)
- Azure AZ-500 (Expected: Jun 2025)

Skills

Programming: Python, Java, Bash, PowerShell

Databases: MySQL, KQL (Kusto)

SIEM & SOC: Azure Sentinel, Splunk, Log Analysis

Detection: Threat Hunting, Incident Response

Networking: Wireshark, tcpdump, Nmap

Security Concepts: CVSS, Patch Mgmt, MFA, RBAC

Compliance: NIST, CIS Controls, GDPR

Soft Skills: Analytical Thinking, Attention to Detail, Time Management, Team Collaboration

Tools & Tech

VSCode, Git, Postman, Kali Linux, VirtualBox, Burp Suite, Metasploit, Nessus, Ubuntu, Nmap

Languages

English (Fluent), Hindi (Native)

Projects

Cyber Attack Detection using Azure Sentinel

- Wrote 15+ KQL queries to detect brute-force attempts, port scanning, and malware triggers across 500+ simulated log entries.
- Simulated 10+ real-world attacks and built dashboards tracking attack frequency and source IPs using Azure Workbooks.

Network Traffic Analysis with Wireshark

- Captured and analyzed over 1,000 SSL/TLS packets in a virtual lab to study traffic behavior and uncover hidden payloads.
- Analyzed HTTP/S headers, DNS queries, TCP/UDP flags, and filtered malicious payloads.

File Integrity Monitoring Tool (Python)

- Monitored 20+ sensitive directories, triggering email alerts within 5 seconds of unauthorized file changes using SHA-256 checksums.

Linux Ransomware Simulation (Python)

- Simulated encryption of 200+ files in a Linux VM, demonstrating risks of poorly secured backup practices and how to mitigate them.

Labs & Exercises

- Created a honeypot lab for detecting credential stuffing attacks.
- Performed a simulated phishing attack in a closed lab setup.
- Set up ELK stack to track and alert on 1000+ log entries, creating 5+ actionable alerts for threat behavior patterns.

Extracurricular

- Cybersecurity CTFs (TryHackMe, HackTheBox)
- Tech Events & MUNs
- Cricket, Badminton & Chess
